SECRETARY

October 29, 2010

Mr. Frank Turner
FJ Turner Company
3516 Williamsborough Ct.
Raleigh, NC 27609

Subject: Notification of Product Status
NP10-5132 Turner Manhole Extension Ring
By: FJ Turner Company

Dear Mr. Turner:

The North Carolina Department of Transportation reviewed the forenamed product and assigned a status of "**Approved for Provisional Use**" to product **NP10-5132** Turner Manhole Extension Ring. This status means the product may be approved for use based on site specific and/or project specific conditions being met. The Turner Manhole Extension Ring is acceptable for use on NCDOT projects where the roadway has a posted speed limit of **45 mph or less**. Prior to the possible installation of your product on a roadway with a posted speed limit in excess of 45 mph, you must contact David Greene, PE at our Materials and Tests Unit to obtain approval. Mr. Greene can be reached at 919-733-7091 or via e-mail at: dgreene@ncdot.gov.

An "**Approved for Provisional Use**" status does not infer the product will be used in NCDOT projects or that the products will be actively promoted by the Department. It will be your responsibility to market your product. If the product is changed for any reason, or your product is not performing effectively, the product status will be changed accordingly.

Additionally, you must recertify your product on an annual basis by the 31st of January. If a recertification is not received by January 31st, the product status will be changed to "Unapproved". Recertification will consist of a statement on company letterhead that the product composition has not changed and all contact information on the original application is correct. If contact information has changed, updated contact information must be included in the statement.
